Summary

I aim for antifragility and have created a niche between business+creative+tech. I specialize in strategy, communications, support infrastructure, and business development in the blockchain/cryptocurrency space. Some clients may not be listed below.

Experience

Cofounder, Lead Growth Strategist

Nori

August 2017 – Present (10 months) | Greater Seattle Area

I cohost the podcast, am working on the token launch, writing an ebook, and am generally focusing on business development with my fine cofounders.

Nori is a company on a mission to reverse climate change by removing enough carbon dioxide from the atmosphere to lower the overall concentration of CO2 below 350 parts per million. We are doing so by building a platform that enables customers to pay other people to remove carbon dioxide from the atmosphere.

Director, Customer Support

Sweetbridge, Inc.

September 2017 – February 2018 (6 months) | Phoenix, Arizona Area

I had a contract to lead and build the Customer Experience team and related infrastructure for the token launch and beyond, and to train a colleague to take my place so I could focus on Nori.

Sweetbridge sponsors the development of blockchain-based economic protocols and applications to transform high-friction global supply chains into Liquid Value Networks. The Swiss-based non-profit foundation is gathering interested industry technologists, blockchain projects and open-source contributors from around the world to form a blockchain alliance. The shared goal is to transform brittle, industrial-era commerce through decentralized industry ecosystems that create a faster, fairer value exchange, unleash working capital, better utilize resources and optimize talent for the benefit of all participants.
